

How to share the devices with others in the phone app

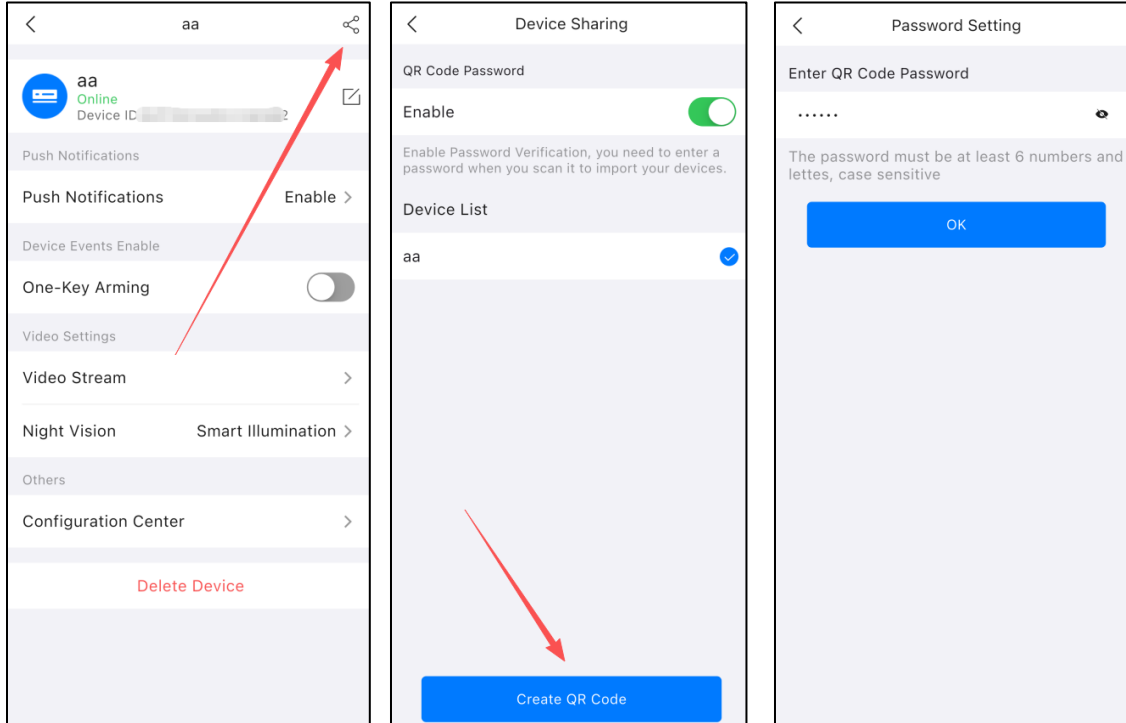

1. Make sure that the device/s is added to your phone app.

2. After adding the device/s, go to the device settings by tapping the **three dots** (...) and then tap **Settings**.

- Click the [Share icon](#) in the top-right and tap [Create QR Code](#). Create a password. Then, tap [OK](#). *Note: This password is for sharing the QR code only; it does not need to be the device password.*

- A QR code will be generated. Click [Save](#) to save the QR code in your phone's Photo/Gallery app. You can send/share this QR code to anyone who needs the device added in their phone app.

5. To add the device in another phone, make sure that the QR code is saved in the Photos/Gallery app on the phone.
- Open the Capture ADV app and tap **+** and select **Scan QR Code P2P**.
 - Tap the image icon and select the saved QR code.
 - Enter the share password and tap **OK**. The device will be added to the app.
